DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, drawn to an absorbent article, classified in class 604, subclass 385.101.
 - II. Claim 39, drawn to a method of making an absorbent article, classified in class 156, subclass 265.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the composite of a high loft nonwoven and superabsorbent material can be made by another process such as combining the superabsorbent with the loft material prior to formation of the web or applying the superabsorbent after formation of the nonwoven web. The limitation in the apparatus claim of in-situ formation of the web is directed to a process of making the article.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3761

4. A telephone call was made to Allison Johnson on 8/6/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
